Subject: Ai Group Response

To Whom It May Concern,

With respect to Ai Group comment on the Discussion Paper A Possible Design for a National Emissions Trading Scheme, I would like to advise you of the following:

Ai Group has recently convened a Leaders Taskforce on Water, Energy & the Environment to guide our policy development in these areas.

While we are not in a position to provide any definitive comment on the paper at this time, Ai Group wishes to acknowledge the work that has gone into the paper and sees it as a valuable resource in the national discussion on Climate Change.

With greater focus in this area Ai Group looks forward to participating in a more formal way in the next phase of the NETS process.

Yours Faithfully

Di Dibley
