Subject: Comment on a National Emissions Trading Scheme

Dear Taskforce Secretariat

I would like to see a National Emissions Trading Scheme for the following reasons:

- a.. Encourage all emitters of CO2 to recognise their responsibility to the rest of the planet and make us more accountable
- b.. Catch up with the rest of the world in recognising we must do something now, be proactive about global warming and not procrastinate any longer
- c.. Encourage alternative renewable energy sources
- d.. Economic incentive for landholders to plant more trees, not to clear anymore virgin bush and farm more sustainably (trees attract rainfall)
- e.. Encourage new industries for Australia where we could be world leaders
- f.. Have a uniform scheme across Australia, rather than different State systems
- g.. Be inspirational for future generations, instead of them asking 'what were you thinking?'

Best regards

Kent Broad
